

GIRL GUIDES, IN YOUR POCKET!

Outdoors Online Program Ideas

1. With materials they have in easy reach, get the girls to make different tracking symbols on the table in front of your video chat. They could lift the camera up to show the rest of the Unit what they've made.

Some ideas for materials include:

Pencils

Spoons

Socks

Lego

Or you could ask your Guides what creative things they could use instead?

2. Get the girls to make a map of their own home. Next they need to make out a trail through the house and show where they'd place the symbols they need. They could share their plans with the rest of the Unit by holding the map up to the screen. Perhaps the girls could provide some feedback to each other on things they may need to consider or think about to make the trail more successful. Encourage them to lay the trail out for a family member (maybe a sibling) with a special surprise at the end.
