

GIRL GUIDES, IN YOUR POCKET!

Construction Challenge

Make choices for a better world: everything used in this activity must be reusable (i.e. no tape, no glue, no breaking things), or must be recyclable (cardboard, insides of toilet rolls, newspaper etc.).

Towers:

- Build a structure with the smallest possible base.
- Using any size base, build the tallest structure you can. How did it go? What did you use, and what could you do better next time?
- Make something stick out from a structure in a creative way. How much weight can it hold?
