

EXTRA PROGRAM IDEAS

Garden Bugs

Investigate the local bugs, insects, and mini-beasts

Investigate your local ecosystem and take photos of the bugs, insects, and mini-beasts that you find. Compile these photos into a journal that includes information about all the different creatures.

- What type of creature is it?
- What kind of environment do they like?
- Where did you find it?
- What colour is it and why could it be that colour?
- What adaptations do they have for the environment that they live in?
- What are their predators?
- What do they do to help the environment?
