

WEEKLY CHALLENGE

Create your own Semaphore Flags

Semaphore requires two flags to send a message. Typically, the flags are made up of two different colour triangles joined together in a square; often they are white & orange or red & yellow, but you can make them any colour you like.

Materials:

- Two dowels/sticks
- Fabric in two different colours
- Glue gun

Steps:

1. Cut a piece of fabric into a square.
2. Cut a second piece of fabric in a different colour into another square of the same size.
3. Cut each square in half diagonally from one corner to the other to form triangles.
4. Take two different colour triangles to form a new square and glue together.
5. Glue the square to the dowel.
6. Repeat steps 4 & 5 to make your second flag.
