

EXTRA PROGRAM IDEAS

Handmade Soap

Option 1: Natural product swaps

At home: Conduct a stocktake of all the cleaning products in your house including what each product is used for. Then, identify what natural alternatives you can make to use instead.

At Guides: The next time you can go to your Guide Hall, conduct a stocktake of all the cleaning products in your Hall. As a Unit, decide on 2-3 products you want to make natural alternatives for. In Patrols or small groups, make enough of the natural alternative for the Guide Hall, but also each Girl Guide to take home and try.

Option 2: Design a new natural cleaning product

Research and create a natural cleaning product. Then, design a label and flyer to use in an advertising campaign to promote your new product.

In Patrols, in either your Virtual Unit Meeting or the next time you can all be together in person, write and perform a television commercial to advertise the product.
