

## Confetti Bowls

### Materials

- Confetti
- 1 balloon
- PVA glue
- Sponge brush
- Scissors
- Vase, cup, or something else to hold the balloon while you work

### Method

1. Inflate the balloon to the size you want your bowl to be and tie off. Set the balloon onto a vase or cup or similar so it's easier to work with.
2. Spread the glue across the top half of the balloon with a sponge brush, then sprinkle confetti all over. Remove the balloon from the vase and hold it to add the confetti on the sides.

3. Place balloon back on vase, and allow glue to dry completely.
4. Add another coat of glue and confetti, as per Steps 2 and 3. Repeat as many times as you need until the confetti is thick enough.

5. Add several coats of glue (about 3-4 coats) until you achieve a thick coat to seal the outside.
6. Let it dry for 8-10 hours.
7. Pop the balloon with a needle, and remove the balloon.
8. Trim the edges with scissors if desired.
9. Enjoy your beautiful bowl!
