

## DIY PET BLANKETS

### You will need:

- Fleece material (1m will make one small-medium blanket, but you can make any size)
- Scissors for cutting fabric
- Ruler/tape measure
- Safety pins or weighted objects

### What to do:

1. Cut the fleece in half so you have two equal sized pieces.
2. Lay them on top of each other, with the right sides (patterned sides) on the outside.
3. Place a few safety pins approximately 10cm in from each corner or use weighted objects to keep the material in place.
4. In each of the four corners, cut out an 8x8cm square.
5. Cut equal sized strips around all edges, measuring approximately 3cm wide and 8cm long.
6. Tie a strip from the top piece of fabric to the strip directly below on the bottom piece with a double knot. Both pieces of fabric should now be joined together.
7. Repeat Step 6 all the way around all four edges of the blanket.
8. Stretch out the sides carefully and remove safety pins/weighted objects.
9. Donate your finished pet blanket to a local animal shelter, or use it for your own furry friends.
