MEDICATION

REQUIREMENTS

To ensure the safety of all participants, please follow these medication requirements:

- Place all medications in a snap-lock bag or similar container.
- Clearly label the bag with your Guide's name and dosage requirements.
- All medications must be in their original packaging.

MELATONIN-ONLY

We understand that melatonin products, particularly gummies, often come in large containers and may be difficult to send.

For melatonin only:

- Place the required dosage in a separate snap-lock bag.
- Include a photo or copy of the original packaging.
- Please note that medication not provided in its original packaging (or melatonin without a copy of the packaging) may result in delays while our First Aid team verifies the product and ingredients.

Providing medications in their original packaging assists our First Aiders and emergency services should your Guide require medical attention.

KIT LIST

- Please ensure all items are clearly labelled with your Guide's name.
- Please remember that each Guide needs to be able to carry her own bag. Accommodation is located both downstairs and upstairs, which may involve carrying luggage up two flights of stairs.
- A good rule of thumb is: If your Guide can't carry their bag, it may be worth re-thinking what has been packed or choosing a different bag. Backpacks and small cabin-sized suitcases are the most practical options for camp.
